

BLOC-SOLID.

OCTA-BLOC interlocking concrete blocks are cost effective, versatile and made to last.

Available in utility and premium grades, the OCTA-BLOC product line from Inland Concrete features a wide variety of shapes, sizes and finishes to choose from. The OCTA-BLOC system creates durable, visually appealing retaining walls, barriers, foundations for temporary structures, protection bollards, fences and silage bins.

The unique locking system of OCTA-BLOC has been designed to be compatible with most other concrete block systems, making it easy to add on to existing structures.

Terms and conditions apply.
